Personal Profile

As a Full-stack and Mobile Developer with additional expertise in Web3 and database technologies, I excel in delivering robust web applications through my strong collaborative, communication, and problem-solving skills.

Summary Qualifications

- Dynamic Full-Stack and Mobile Developer with extensive experience in JavaScript, React ecosystems, Node.js, PHP, and Laravel.
- Skilled in end-to-end application development, from database management (SQL, NoSQL) to user interface design.
- Proven track record in leveraging technologies to optimize MLM business processes and enhance customer engagement systems.
- Adept at leading development teams, fostering collaboration, and navigating cross-platform integrations and migrations.
- Committed to innovation with a customer-focused approach, delivering responsive, accessible, and scalable digital solutions.

Tech Stack

Programming Languages: JavaScript (ES6+), JSX, PHP

Front-End Development: HTML, CSS, Sass, Bootstrap, JQuery, React.js, React Native, React-Redux, Redux Toolkit, Vue.js, Pinia, Accessibility, DOM Manipulation

Back-End Development: Node.js, Express.js, Laravel

Databases: MongoDB, MySQL, Firebase, Redis

DevOps & Deployment: Docker, Digital Ocean, Netlify

Version Control & Collaboration Tools: Git, GitHub, Bitbucket, Slack, Discord

Other : Statamic(CMS), RESTful APIs, Object-Oriented Programming (OOP)

Learning: Swift, Objective-c (IOS DEVELOPMENT)

Problem-Solving | Leadership| Communication | Teamwork | Adaptable | Decision-making

RECENT PROJECTS

Opulence Global(Still in developmnet) (Corporate   Project)
- Our website is an online fashion store where users can buy luxurious items by connecting through Metamsk to pay in our company-created token (crypto), which is built on (BEP-20).
- We have used MERN stacks technologies to build robust APIs and amazing frontend technologies for a friendly user experience.
- We are also working on a React native app using the same API and model for users to get the same convenient experience using mobile applications.

EMPLOYMENT HISTORY

Software Developer

Opulence Global (AUGUST-2022 - Present) |Richmond Hill ON

- **Software Development for Business Operations:** Lead the development of specialized software solutions to enhance Multi-Level Marketing (MLM) business operations, focusing on efficiency and scalability.
- **Binary Tree System Enhancement:** Refined and optimized the Binary Tree system, significantly improving reporting capabilities and commission calculation accuracy. This enhancement streamlined key business processes and contributed to more transparent and accurate financial operations.
- **Mobile Application Management:** Led the management and update of the company's mobile application. Implemented new features such as real-time notifications, enhancing user engagement and providing a more interactive user experience.
- **CRM Upgrade:** Played a pivotal role in upgrading the Customer Relationship Management (CRM) system. Focused on enhancing customer engagement and interaction, resulting in improved customer satisfaction and retention rates.
- **Software Transitioning:** Assisted in the seamless transition from legacy systems to modern software solutions using a microservices architecture. This transition was pivotal in improving system reliability and facilitating easier updates and maintenance.
- **Admin Tool Design:** Designed and developed administrative tools for backend operations, streamlining processes and improving operational efficiency. This initiative provided the team with robust tools for more effective management and oversight of backend activities.

EDUCATION & TRAINING

JUNO COLLEGE, Bootcamp (2021)
- Immersive Web Development Certificate
- Accelerated JavaScript
- Accelerated Web Development
